REPORT
TO
THE HONORABLE JOHN TUTHILL BAGOT, M.L.C.,
CHIEF SECRETARY,
&c., &c., &c.

Chief Secretary's Office, Adelaide, 7th October, 1869.

Sir—

In presenting to you the "Statistical Register of South Australia for 1868," I have the honor to submit the following report for the information of His Excellency the Governor, briefly bringing under notice the result of statistical inquiry, so far as relates to the social and material condition of the community during the period under review.

POPULATION.

The total number of the population on 31st December, 1868, is estimated to have been 176,298 souls (91,347 males and 84,951 females), or an addition of 3,438 persons. The natural increase from excess of births over deaths was 4,731 souls (2,328 males and 2,403 females); but the departures (by sea) exceeded the arrivals by 1,293 (972 males and 321 females), leaving a net increase of 3,438 only (1,356 males and 2,082 females), as above stated, being the smallest recorded since 1860. The rate of increase was under two per cent., as compared with 2·2 per cent. during the previous year; whilst, in the four years preceding, the annual augmentation had been at the rate of five per cent.

BIRTHS, DEATHS, AND MARRIAGES.

Seven thousand two hundred and forty-seven births were registered in 1868, or 206 more than in the preceding year; the birth rate being 42 per thousand of the population at the commencement of the year, as against 41·6 per thousand in 1867. The male births numbered 3,709, and the female 3,538, in comparison with 3,616 and 3,425 respectively the year before—about 105 boys being born to every 100 girls. The total number of births is the highest recorded here in a single year; the birth rate is, however, three per thousand below that existing a few years ago.

The mortality during the twelve months was less than in any year since 1863, with one exception (1865); the rate, 14·5 per thousand, being also the lowest recorded. The total deaths numbered 2,516 (males, 1,381, and females, 1,135), showing a decrease of 423 upon the year 1867, when the death rate was 17·4 per thousand. Decreased fatality is chiefly apparent in the zymotic, local, and developmental classes of disease.

In 1867 no less than sixty-two per cent. of the total deaths were children under five years of age—measles, diphtheria, typhoid fever, and diarrhoea having proved exceedingly fatal—being, in fact, eleven per cent. over the rate of 1866. Last year, on the other hand, mortality from these diseases was comparatively infrequent; the total number of children dying under five years old being reduced from 1,831 to 1,474, or to 50·1 per cent. of the gross mortality. Fewer deaths of infants were registered, the number dying under two years of age being 1,290, as compared with 1,558; the rate of infantile mortality declining from fifty-three per cent. to fifty-one per cent. of the total deaths, or slightly above the average.

The natural increase of the population amounted to 4,731 souls, or 629 more than in 1867, and being 2·74 per cent. on the number living at the beginning of the year. The rate of increase in the previous year was 2·43 per cent. Twelve

Twelve hundred and eighty-six marriages were celebrated, being ninety-three less than in 1867, and fewer than in either of the preceding four years.

PUBLIC WORSHIP.

The returns furnished by the several religious denominations show thirty-six additional churches or chapels, and twenty-one additional rooms used for religious services, making the total number of places of worship to be 754, with accommodation for 112,878 persons, or more than sufficient to seat the whole population of fourteen years of age and upwards. The following table gives the information afforded on the subject for each of the three past years :—

	1866.	1867.	1868.
Number of churches or chapels	492	511	547
“ sittings in ditto	91,816	98,496	103,488
“ rooms used, &c.	153	186	207
“ sittings in ditto	6,361	7,245	9,390
Total number of places of worship	645	697	754
“ sittings provided	98,177	105,741	112,878
Sunday schools	398	416	446
Sunday-school teachers	3,807	3,961	4,150
Sunday scholars	25,914	26,506	28,719

Sunday schools now number 446, or thirty more than last year, the number of teachers being 4,150 (males 2,063, and 2,087 females), and of scholars 28,719, of whom 14,291 were boys and 14,428 girls.

EDUCATION.

The returns furnished by the Central Board of Education relate only to licensed schools, of which there are 325, conducted by 223 schoolmasters and 102 schoolmistresses, showing an increase of seventeen schools upon the number given in the preceding year. The aggregate number of children on the roll was 15,657—boys 8,699, girls 6,958—or an increase of 1,057 scholars. The average number on the roll for each school was 48 against 47·4. The average number of scholars attending was 6,834 boys and 5,308 girls, or together, 12,142, as compared with 11,448 last year, the proportion of children in daily attendance being 77·5 per cent. of the gross number on the roll. Out of 15,657 scholars, 1,553 only were at city schools, 1,446 in other corporate towns, and the remainder in the country districts. One-half of the children in attendance were from seven to ten years of age, one-fourth under seven years old, and the other fourth were eleven years of age and upwards. The average number of destitute children attending the schools was 1,438. Seventy-nine school-houses have been built under the supervision of the Board, and are now held in trust for educational purposes, the total grant-in-aid being £14,723.

The grant for stipends amounted to £16,680, which, together with the fees paid by parents, &c., £14,137, shows that £30,817 have been received by teachers, or twenty-one shillings and threepence from the Government for each scholar on the rolls, and twenty shillings and threepence in the shape of school fees.

The aggregate amount expended by the State for educational purposes during the past decade is £190,346, the sum spent last year being £24,540. In 1864 the Legislature voted the sum of £18,388, additional provision being made yearly as required.

REVENUE AND EXPENDITURE.

The revenue for the year 1868 amounted to £716,004, or within £290 of the sum collected during the previous twelve months, whilst the expenditure was reduced from £1,003,271 to £852,689, or by £150,582. With two exceptions—the sales of waste lands and the receipts from the railways—but little difference appears in the several items of income for the two years. An increase of £52,727 is shown in land sales, being £224,490 as against £171,763, and a reduction of £41,809 upon railways, the receipts from this source having fallen from £126,420 to £84,611, owing to the failure of the harvest. The Customs receipts amounted to £198,531 as compared with £200,832.

Customs duties being the sole means of taxation resorted to in this Province, and the tariff having remained unchanged for five years past, the amount of the burden the inhabitants of this Colony labor under for the support of Government is readily ascertainable. It is only necessary to state that the average contribution of each individual towards the protection of life and property and other duties of the State during the past five years has been twenty-six shillings yearly to show that South Australia is the lightest taxed community in the world. In 1865 the Customs duties averaged 30s. per head; in 1866, 27s. 2d.; in 1867, 23s. 3d.; and last year 22s. 6d. per head of the population.

Did

Did the community now contribute taxes in the same ratio as in 1865 the receipts from Customs would reach £265,000 instead of £198,000—the sum collected last year.

Although the aggregate receipts and expenditure of the State are large, considering the number of the population, it must be remembered that the Government of a young community having vast landed estate is compelled to undertake responsibilities borne in older countries by individuals or associations. The interest on and redemption of the public works debt, the formation and maintenance of internal means of communication, roads, railways and tramways, telegraphs, waterworks, and the construction of other large public works, as also the surveys of land, entail heavy costs, but are met by receipts derivable from the sale and occupation of the waste lands and by the charges levied for the accommodation afforded to the public. Again, the large expenditure for education, police, hospitals, destitute poor, and lunatic asylums is defrayed by the State without that further local taxation resorted to in the mother country.

During the past ten years, the gross receipts on account of the Public Revenue (exclusive of loans raised for Public Works), amounted to £6,936,789, and the expenditure to £7,148,427. Of the former sum the Ordinary Revenue has contributed £4,306,092, of which £1,733,659 accrued from *taxation*, and the remaining £2,572,433 from other general receipts. The total sum of £6,936,789 being made up by the proceeds of the Land Fund, amounting to £2,630,696.

During the same period the total expenditure has amounted to £7,148,427, out of which £2,919,780 has been spent on Public Works (exclusive of payments from loans £1,108,248), and £306,211 upon immigration, together £3,225,991, or £595,295 more than the Land Fund produced during those years. The remaining expenditure is lumped together under the vague head of Establishments, Miscellaneous Services, &c.; the public accounts, as at present rendered, failing to exhibit how much represents the actual cost of governing the country, or what proportion should be debited to the multifarious extra-governmental undertakings here imposed on the State.

LOANS FOR PUBLIC WORKS.

The total amount of the Bonded Debt at the close of the year was £1,663,100 sterling. The total sum authorized to be raised since the first loan was contracted is £2,519,500, of which, Bonds representing £2,064,400 have been issued, and £401,300 redeemed, leaving the amount outstanding as above stated.

BANKING.

The several banks have issued the half-yearly returns as required by Act of Parliament, and the usual comparative statements have been published. Following is an abstract shewing the aggregate average assets and liabilities for the last half-year of 1866, 1867, and 1868, respectively:—

	LIABILITIES.								
	1866.			1867.			1868.		
	£	s.	d.	£	s.	d.	£	s.	d.
Notes in circulation	239,372	8	2	247,786	4	1	225,708	11	1
Bills in circulation	42,246	19	4	10,332	17	1	11,793	19	0
Balances due to other banks	32,210	9	2	39,600	18	9	18,272	13	9
Deposits	1,401,565	9	5	1,272,164	10	9	1,293,420	1	0
Total average liabilities	£1,715,395	6	1	£1,569,884	10	8	£1,549,195	4	10
	ASSETS.								
	£	s.	d.	£	s.	d.	£	s.	d.
Coin and bullion	318,927	5	5	378,265	17	3	333,224	0	5
Government Securities	4,600	0	0	38,850	14	10	25,000	0	0
Landed property and bank premises ..	86,404	9	1	99,745	8	1	102,088	10	1
Notes and bills of other banks	26,611	8	9	17,367	7	2	32,979	1	3
Balances due from other banks	63,426	7	3	74,441	9	8	71,031	12	5
Notes and bills discounted and other debts due to banks not enumerated	3,120,092	10	10	2,559,742	14	1	2,669,886	7	8
Total average assets	£3,620,062	1	4	£3,168,413	11	1	£3,234,209	11	10

Although the differences existing in the several items of the returns for the two periods are of no great amount, they tend to show an improvement in confidence after the severe pressure of the preceding year. The deposits increased from £1,272,164 to £1,293,420, whilst the notes and bills discounted advanced from £2,559,742 to £2,669,886. The aggregate liabilities were £1,549,195 as against £1,569,884, and the assets £3,234,209 as compared with £3,168,413 the year before.

SAVINGS BANK.

Financial improvement is also shown by the returns issued from the Savings Bank; a large increase appearing in the number of depositors, and the payments into the bank being

being greater than in any previous year. The total number of new accounts opened was 2,784, or 463 more than last year; the aggregate number of depositors being 9,659, or an addition of 976. The total amount of deposits was £170,566 as against £145,207, an increase of £25,359; whilst the withdrawals amounted to £147,660 as compared with £133,848 the preceding year. The amount at the credit of the several depositors at the close of the year was £312,728, or £38,220 additional. The following statement affords an interesting retrospect of the bank's business during the past five years:—

	1864.	1865.	1866.	1867.	1868.
New accounts opened (number)	1,806	2,333	2,135	2,321	2,784
Increase in depositors (number)	1,132	1,233	603	1,004	976
Amount deposited	£120,924	£131,115	£124,427	£145,207	£170,566
“ withdrawn	£87,731	£115,751	£147,524	£133,848	£147,660
“ depositors' balances	£231,972	£258,693	£249,329	£274,508	£312,728
“ reserve fund	£13,431	£15,378	£17,370	£19,587	£21,147
“ total funds	£245,403	£274,071	£266,700	£294,095	£333,875

Six per cent. per annum was allowed to depositors in the shape of interest, as in 1867. £25,000 is invested in Government securities, and £187,254 of the deposits is lent on mortgage of freehold property, at eight per cent. The reserve fund amounts to £21,147 sterling. Agencies have been established in eighteen of the principal townships, in connexion with telegraph and post offices.

IMPORTS AND EXPORTS.

With an almost total failure of the harvest, it might have been expected that the trade returns for 1868, would have been singularly unfavorable. It is, however, satisfactory to note that although the trade in one of the chief staples (breadstuffs) fell off one half, the increase in other branches of commerce went far to make up the deficiency, and that the total exports of produce exceeded the amount of imports retained for home consumption, by more than half a million sterling. In place of £658,288, the sum of £580,790, represented the balance of exports of produce, over imports consumed.

The combined import and export trade amounted to £5,057,810, or £613,206 less than in the previous year. The total imports were valued at £2,238,510, or a decrease of £267,884, and the aggregate exports at £2,819,300, or £345,322 less; the diminution in the quantity of goods purchased, nearly corresponding with the decrease in the staples exported.

The following statement shows the combined import and export trade for each year since 1859, inclusive, the total imports, the imports retained for home consumption, the imports re-exported, the aggregate exports, the value of staple produce exported, and the difference between the latter and the value of imports consumed in the Province:—

Year.	Combined import and export trade.	Total imports.	Imports retained for home consumption.	Imports re-exported.	Total exports.	Exports of produce of the Colony.	Balance produce exported over imports consumed.
	£	£	£	£	£	£	£
1859.....	3,163,370	1,507,494	1,353,783	153,711	1,655,876	1,502,165	148,382
1860.....	3,423,307	1,639,591	1,432,201	207,390	1,783,716	1,576,326	144,125

1862.....	3,966,452	1,820,656	1,595,347	225,309	2,145,796	1,920,487	325,140
1863.....	4,387,096	2,028,279	1,764,818	263,461	2,358,817	2,095,356	330,538
1864.....	5,718,476	2,412,931	2,122,923	290,008	3,305,545	3,015,537	892,614
1865.....	6,057,442	2,927,596	2,552,407	375,189	3,129,846	2,754,657	202,250
1866.....	5,693,879	2,835,142	2,516,128	319,014	2,858,737	2,539,723	23,595
1867.....	5,671,016	2,506,394	2,117,867	388,527	3,164,622	2,776,095	658,228
1868.....	5,057,810	2,238,510	2,023,036	215,474	2,819,300	2,603,826	580,790

The trade with the United Kingdom amounted to £2,837,249, as against £2,624,268 last year. Of this £1,411,508 represented imports, or £213,265 more than last year, and £1,425,741 exports thereto, or nearly the same amount as in 1867. The balance of trade was in favor of South Australia by £14,232 only, as compared with £227,781 in the year preceding.

Inter-colonial business of course chiefly suffered, transactions with the neighboring Colonies being fully one-third less. With Victoria the combined import and export trade amounted to £1,027,340, as against £1,372,971, or £345,631 below that of 1867. The balance in favor of this Province was £357,586, as compared with £464,254, or £106,668 less. We imported from Melbourne, goods of the value of £334,876, a reduction of £119,482, and exported produce thereto worth £692,463, as against £918,613 or a decrease of £226,150 on the previous year.

Again, with New South Wales, the falling off in trade was considerable—in fact, greater

greater in proportion than with the adjoining Colony; the balance of trade was this year in favor of South Australia by £172,575, instead of against us by £106,039, as was the case in 1867. The total transactions amounted to £525,812, as compared with £932,296, or a diminution of £406,484, or nearly one-half. The imports from thence reached only £176,618, instead of to £519,168; whilst the produce exported thereto was valued at £349,194, instead of £413,128, or by £63,934 less. The reduction in the imports is chiefly accounted for by the exceptionally large quantity of river-borne wool brought down from the Darling in 1867, represented as of the value of £414,415. Last year the value of the cargoes brought down stream was £86,121 only; the exports by way of the Murray amounting to £70,311, as against £94,914, showing a reduction of £24,603.

Exports to Queensland were valued at £107,193, nearly the same amount as in the previous year; but those to New Zealand fell from £83,835 to £24,039 only.

From Tasmania we imported Timber, &c., worth £22,556; or £6,669 less than in the preceding twelve months.

Trade with Western Australia was about equal in amount to that of last year; the imports thence (including bullion, £24,508), amounting to £46,157, and the exports to £40,027. The value of the wool brought here for transhipment was £12,448, as compared with £11,431 in 1867.

The shipments to the Cape, chiefly breadstuffs, amounted to £31,159, as against £47,896; whilst the exports (copper) to India increased from £69,343 to £73,409. With Singapore and Batavia more trade was done; the exports to the former increasing from £6,810 to £8,035, and with the latter from £3,124 to £4,934.

The Mauritius trade shows a reduction in the imports, £114,438, as against £137,248; and, in exports thereto (excluding specie, £46,000), of £2,902—being £17,005, instead of £19,907 the year before. The imports from China amounted to £67,334, as against £56,650; from Sweden £31,979, as against £27,083; and from the United States, £18,296, as compared with £23,006.

Bullion and coin to the extent of £64,508 was imported—or £28,884 less than last year; the exports amounting to £49,221, as against £325 last year. The shipments are thus recorded:—South Australian Gold, 773½ ounces, £2,936; ditto, silver, 1,140 ounces, £285; and coin, £46,000. The balance of specie retained in the Colony was, therefore, £15,287 sterling.

EXPORTS THE PRODUCE OF THE COLONY.

Continuing the practice hitherto adopted, I append the following returns showing the progress made in the chief branches of industry during the past decade. The first table subjoined gives the total value of the Colonial produce exported, and of the three principal staples, in the years 1859, 1863, and 1868, respectively, the commencement, middle, and termination of the first decade; also the aggregate value of such exports during the quinquennial periods ending 1863 and 1868; together with the average annual shipments in the same periods, and the proportion which the shipments of agricultural, pastoral, and mineral products respectively bore to the total shipments:—

Period.	Total Exports of Produce.	Of which Exports.			
		Breadstuffs, Grain, &c.	Wool.	Copper and other minerals.	Miscellaneous Products.
	£	£	£	£	£
In the year 1859.....	1,502,165	554,265	484,977	411,018	51,905
“ 1863.....	2,095,356	747,116	715,935	542,393	89,912
“ 1868.....	2,603,826	568,491	1,305,280	624,022	106,033
Total in five years, 1859-63.....	8,932,973	3,146,513	3,032,557	2,399,739	354,164
“ 1864-68.....	13,689,838	4,944,050	4,812,123	3,513,672	419,993
Average of five years, 1859-63.....	1,786,595	629,303	606,511	479,948	70,833
“ 1864-68.....	2,737,968	988,810	962,424	702,734	84,000
Rate per cent. of average exports of 1859-63.....	100.0	35.2	33.9	27.0	3.9
Rate per cent. of average exports of 1864-68.....	100.0	36.2	35.2	25.6	3.0

It requires but a cursory glance at the foregoing statement to ascertain the development in the production of the three staples, wheat, wool, and copper, during the past ten years

years; and, although periods of depression have occasionally arisen, owing chiefly to exceptional seasons, the progress of the country, as shown by the exports of produce, has been rapid and substantial. During the ten years the shipments of produce have amounted to twenty-two and a-half millions sterling; and that, whilst during the first half of the period the exports averaged one and three-quarter millions, during the latter half they had increased to an average of two and three-quarter millions sterling. It will also be observed that the increase has been progressive; for, in 1859, the total exports were valued at £1,502,165; those of the year 1863, at £2,095,356; and of the year just closed, at £2,603,826 sterling.

In comparing the average annual shipments of the three staple commodities during the first half of the decennial period with those of the last, it will be found that the latter shows an augmentation of more than fifty per cent. in each class. The average annual export for the five years ending 1863 of breadstuffs was £629,303, whilst that of the quinquennial period ending 1868, was £988,810; of wool £606,511, as compared with £962,424; and of minerals £479,948, as against £702,734.

The following statement shows as closely as possible the relative value of wheat, wool, and copper, as compared with the total exports of produce:—

Five Years, ending with	Ratio of average of five years' Exports of each class to total Exports=100.			
	Breadstuffs.	Wool.	Minerals.	Miscellaneous.
	Per Cent.	Per Cent.	Per Cent.	Per Cent.
1859	39.3	31.5	27.1	2.1
1860	38.2	31.6	27.6	2.6
1861	38.0	32.5	26.7	2.8
1862	35.5	33.4	27.2	3.9
1863	35.2	33.9	27.0	3.9
1864	38.8	31.8	25.7	3.7
1865	41.2	30.8	24.5	3.5
1866	38.3	31.9	26.2	3.6
1867	38.8	32.1	26.0	3.1
1868	36.2	35.2	25.6	3.0

Taking the average of the five years terminating with 1863, the value of breadstuffs formed 35.2, wool 33.9, copper 27.0, and miscellaneous articles 3.9 per cent. of the total exports. Taking the like average for the similar period ending in 1868, we find breadstuffs contributed 36.2, wool 35.2, copper 25.6, and miscellaneous articles 3.0 per cent. of the gross produce.

BREADSTUFFS, GRAIN, &c.

When it is remembered that the harvest of 1867-8, owing to the ravages of red rust produced little more than one-third of the average yield of the last ten years, that is, $4\frac{2}{3}$ bushels to the acre instead of twelve, the decline in the export trade in breadstuffs is less than might have been anticipated. The pressure upon the agricultural classes was partly relieved by the advance in the average price of wheat from 4s. 5d. to 7s. 1d. per bushel. The disastrous effect of the failure of the harvest was the more severely felt from the prolific yield of the preceding year ($14\frac{1}{3}$ bushels) having induced the farmers to place a very much larger area of land under crop.

Reference to the following table shows the results of the wheat harvest, and the export trade in breadstuffs during each of the past five seasons:

Year.	Acres under Wheat.	Wheat Harvest.	Average yield per Acre.	Flour and Wheat shipped.	Average price Wheat, \pounds bushel.	Total value Breadstuffs, Grain, &c., shipped.
		Bushels.	Bs. lbs.	Tons.	s. d.	£
1864.....	335,758	4,691,919	14 0	76,553	8 6	1,464,593
1865.....	390,836	4,252,949	11 0	60,513	8 7	1,228,480
1866.....	410,608	3,587,800	8 44	38,808	6 2	645,401
1867.....	467,628	6,561,451	14 20	97,311	4 5	1,037,085
1868.....	550,456	2,579,894	4 40	33,520	7 1	568,491

During the three years, 1863, 1864, and 1865, when the harvests yielded slightly above the average of twelve bushels, we shipped cereals at the rate of sixty-six thousand tons yearly; during 1867 we exported ninety-seven thousand tons, but in 1868, owing to the causes above stated, only thirty-three thousand five hundred tons.

The frequent fluctuations in the wheat market often rendering comparisons between the values of cereal exports of little avail, and in order to prevent misconception arising therefrom

therefrom, the following tabular statement of quantities has been prepared. It gives the shipment of breadstuffs in 1859, 1863, and 1868; also the total exports for the quinquennial periods ending 1863 and 1868, and the average yearly shipments during those periods:—

Period.	Flour.	Wheat.	Total in Flour, at 45 bushels to ton.	Bran and Pollard.
	Tons.	Bushels.	Tons.	Tons.
In the year 1859	19,350	292,736	25,855	4,330
“ 1863	39,722	932,272	60,434	7,381
“ 1868	23,591	447,008	33,520	1,787
Total in five years, 1859-63	148,853	2,835,112	211,855	26,589
“ 1864-68	177,858	5,798,248	306,708	20,649
Average of five years, 1859-63	29,770	567,022	42,371	5,317
“ 1864-68	35,572	1,159,650	61,341	4,130

It will be observed that last year, notwithstanding the deficient harvest, we exported one-third more grain than we did ten years ago, so greatly has cultivation increased; also that the average shipments of the last five years of the decade show an increase of one-half, or 61,341 tons as compared with 42,371 tons yearly.

WOOL.

Twenty thousand more bales of wool were shipped in 1868 than in the previous year; the total quantity exported being 29,629,525lbs., in 86,913 bales, as compared with 22,633,792lbs., in 66,395 bales, during the previous year, showing an increase of 6,995,733lbs., and of 20,518 bales. In three years the shipment of wool from this Colony has increased fifty per cent. Only 730,335lbs. (2,284 bales) of the above quantity was the produce of neighboring Colonies passing through our ports.

The following table shows the remarkable development of the wool trade during the three past years.

Year ended 31st December.	1866.	1867.	1868.
	lbs.	lbs.	lbs.
From Port Adelaide	12,164,497	12,948,653	18,845,487
Port Wakefield	3,374,226	1,138,200	1,763,450
Port Robe	1,539,500	1,625,200	1,793,289
Port Augusta	857,188	2,329,515	4,210,307
Port MacDonnell	1,423,919	1,059,285	1,927,369
Port Victor	113,400	—	—
Port Caroline	266,793	249,442	359,288
Total Export of South Australian Wool	19,739,523	19,350,195	28,899,190
Produce of other Colonies	1,168,562	3,283,597	730,335
Total shipment (lbs.)	20,908,085	22,633,792	29,629,525
Total shipment (bales)	61,977	66,395	86,913
	£	£	£
Total value of South Australian Wool	990,173	919,532	1,305,280
Total value of other Wool	74,313	224,809	41,043
Total value	1,064,486	1,144,341	1,346,323

Of the total shipments, 71,056 bales left Port Adelaide direct for London, and 15,857 bales by way of Melbourne. In the preceding year, 46,607 bales were shipped direct home, and 19,788 by the Melbourne route.

As the busiest time of the wool season is towards the close of the year, a portion of the clip is returned in the exports of the ensuing year; it is, consequently, desirable to make up returns from June to June, in order to avoid error when comparing the clip of one season with that of another. The following statement, showing the actual shipments of each of the past five clips, readily affords the desired information:—

Year ended 30th June.	1865.	1866.	1867.	1868.	1869.
	lbs.	lbs.	lbs.	lbs.	lbs.
Port Adelaide	10,381,539	9,277,556	11,448,696	16,405,079	17,236,166
“ Wakefield	1,833,800	2,981,078	2,301,826	1,573,750	1,327,900
“ Robe	1,760,400	1,736,460	1,639,400	1,480,480	1,771,699
“ MacDonnell	1,014,850	800,790	1,468,772	1,626,097	1,486,949
“ Wallaroo	—	77,507	—	—	—
“ Augusta	2,206,325	998,315	857,188	2,570,915	3,968,907
“ Victor or Port Elliot	294,000	179,800	—	—	—
“ Caroline	—	72,383	289,229	370,348	197,314
Total weight (lbs.)	17,490,914	16,123,889	18,005,111	24,026,669	25,988,935

The following figures give the quantity and value of South Australian wool shipped in

in 1859, 1863, and 1868; also during the quinquennial periods terminating in the years 1863 and 1868, and the average annual shipments of those periods:—

Period.	Quantity.	Value.
	lbs.	£
In the year 1859	9,496,715	484,977
“ 1863	15,566,787	715,935
“ 1868	28,899,190	1,305,280
Total in five years, 1859-63	63,188,273	3,032,557
“ 1864-68	100,350,893	4,812,123
Average of five years, 1859-63	12,637,655	606,511
“ 1864-68	20,070,178	962,424

It will be seen from the above that, notwithstanding the terrible effects of the drought, the increased production of the past five years has been most remarkable—in the five years ended 1868, the average annual shipment being twenty million pounds weight, as against twelve and a half million pounds. In 1859, the export amounted to 9,496,715 lbs., in the year 1863 it had increased to 15,566,787 lbs., and in 1868 to 28,899,190 lbs., showing a rate of progression during the intervening periods of sixty and eighty-five per cent. respectively.

MINERALS.

During the past decade the value of the mineral produce exported from South Australia is returned at nearly six millions sterling. During the first half of that period the mineral exports were of the value of £2,399,739, showing an average of £479,948 yearly, whilst during the last five years the aggregate shipments have amounted to £3,513,672, or an annual average of £702,374 sterling. Subjoined are the quantities and values of ores and metals exported during the latter period:—

Minerals.	1864.	1865.	1866.	1867.	1868.
Fine Copper	134,055	100,196	129,272	156,863	104,227
£	637,791	433,795	584,509	627,384	400,691
Copper Ore	4,545	16,176	16,824	11,430	20,725
£	38,125	184,677	225,683	113,409	207,519
Lead	63	82	1,351	3,391	3,049
£	121	133	2,991	5,464	5,670
Lead Ore	567	86	648	212	76
£	13,107	1,507	11,318	3,353	1,245
Regulus	52	—	—	25	10
£	2,480	—	—	560	213
Total value (including other minerals)	691,624	620,112	824,501	753,413	624,022

The continued depression in the copper market is traceable in the foregoing statement, for while production has increased the money value has declined. Less fine copper and more unsmelted ore was exported in 1868 than in the preceding year. Instead of sending away *weekly* one hundred and fifty tons of pure copper, only one hundred tons were shipped; whilst 20,725 tons of copper ore were exported, as compared with 11,430 tons in 1867. The total value of all the minerals exported was £624,022, or £129,391 less than in the previous year. The progress of mining industry can, however, only be accurately estimated by the returns of *quantity* of produce raised and shipped. Materials for a comparison of such, extending over a period of ten years, is subjoined:—

Period.	Copper.	Lead.	Copper Ore.	Lead Ore.	Regulus.
	Cwts.	Cwts.	Tons.	Tons.	Tons.
In the year 1859	56,745	1,261	7,306	262	141
“ 1863	96,039	271	5,343	451	39
“ 1868	104,227	3,049	20,725	76	10
Total in five years 1859-63	365,132	5,038	33,779	893	1,326
“ 1864-68	624,613	7,936	69,700	1,589	87
Average of five years, 1859-63	73,026	1,007	6,756	178	265
“ 1864-68	124,922	1,587	13,940	318	17

Analyzing the above, it will be found that during the five years ended 1863 the quantity of fine copper exported was 365,132 cwt., and of ore 33,779 tons, giving a yearly average

average of 73,026 cwts. and 6,756 tons. During the succeeding five years ended in 1868 the shipment of metal had risen to 624,613 cwts., or 124,922 cwts. annually; and of ores to 69,700 tons, or 13,940 tons yearly. The latter half of the decade shows an augmented production of nearly one hundred per cent.

LAND CULTIVATION AND LIVE STOCK.

The following extracts from my report on the Agricultural and Live Stock Statistics for the season ended 31st March last supply full information on this subject to the latest date:—

“During the year 1868 the area of land alienated by the Crown amounted to 199,693 acres, or 55,672 acres more than in the year preceding, making the total area of land in the possession of freeholders to be 3,769,897 acres, or equivalent to 21·9 acres per head of the population, or 1·1 acre more than last year. About two-thirds of this land is in the occupation of the freeholders themselves. Ten years ago there were 18·8 acres alienated for each individual, or 3·1 less than at present, showing that the acquisition of real estate has more than kept pace with the increase in population.

“Twenty-one per cent., or one in every five acres, of purchased land was under cultivation, being slightly below the proportion shown in the previous year, when twenty-three per cent. was under tillage. The total area under cultivation was 808,234 acres, or 2,500 less than in 1867-8, which season showed an increase of 71,020 acres, or ten per cent., over its predecessor. When it is considered that the disastrous effects of the preceding harvest, unparalleled in the Colony's history, were pressing most heavily on the whole body of agriculturists, it is the more extraordinary that the area of land brought under the plough should have been so closely maintained, and the check to agriculture only have affected the *annual increase* in the breadth of land under tillage.

“Last season four and three-quarter acres were under cultivation for each individual of the population, or fourteen acres for each male of fourteen years and upwards. During the season just closed the same proportions were maintained.

“In 1867-8 no less than 68 out of every 100 acres of cultivated land were cropped with wheat. During the past season the cultivation of this cereal amounted to sixty-six per cent. of the total cultivation, the difference, only two per cent., being made up by the additional area under barley and hay.

“The total acreage under wheat amounted to 533,035 acres, as compared with 550,456 acres in the previous season, or a decrease of 17,471 acres. If to this be added the probable increase in wheat culture which might have been anticipated under ordinary circumstances, the actual decline in wheat production, consequent upon the total failure of the preceding harvest, may be estimated at seventy thousand acres.

“It must, however, be noted that in the two preceding seasons the cultivation of wheat had increased one-third, and that the crop of 1868-9, although less than that of 1867-8 by 17,421 acres, as above stated, exceeded that of 1866-7 by 75,407 acres. In 1866-7 we grew two and three-quarter acres of wheat, in 1868-9, three and one-fifth acres, and last season three and one-tenth acres for each individual of the population.

“The total quantity of grain reaped was 5,173,970 bushels, giving an average of nine and two-thirds bushels to the acre. It is useless to institute a comparison with the previous year's return, as that only gave 2,579,894 bushels, or four and two-thirds bushels per acre—almost a total failure, and unprecedented in our history. Taking the average yield for the whole Colony, for a number of seasons, at twelve bushels, the crop of 1868-9, was two and one-third bushels below it. During the preceding ten years, on only three occasions has the average yield been so light as 9 bushels 42lbs. The following table shows the total area of land under cultivation, the acreage under wheat, the gross produce of the harvest, and the average yield per acre for each season, since that of 1857-8:

Season.	Acres cultivated.	Acres under wheat.	Produce, Wheat.	Average per Acre.
			Bushels.	Bush. lbs.
1858-9	264,462	188,703	2,109,544	11 11
1859-60	361,884	218,216	2,103,411	9 38
1860-1	428,816	273,672	3,576,593	13 4
1861-2	486,667	310,636	3,410,756	10 59
1862-3	494,511	320,160	3,841,824	12 0
1863-4	555,968	335,758	4,691,919	14 0
1864-5	587,775	390,836	4,252,949	11 0
1865-6	660,569	410,608	3,587,800	8 44
1866-7	739,714	457,628	6,561,451	14 20
1867-8	810,734	550,456	2,579,894	4 40
1868-9	808,234	533,035	5,173,970	9 42

"Fifty per cent. more barley was sown; 21,244 acres against 13,816 acres, the total produce amounting to 311,142 bushels as against 193,341 bushels in the previous season; the average yield being very low, only 14 bushels 32lbs. to the acre. The increased attention paid to the growth of this cereal cannot but produce valuable results. As the demand for malting purposes is annually increasing, doubtless care will be taken to cultivate the description of grain most suitable for the brewer.

"Peas have also been cultivated to a greater extent, one-fourth more land being planted, viz.:—4,358 acres against 3,499 acres. The quantity of seed produced was 49,279 bushels, as compared with 36,381 bushels, an increase of 12,898 bushels; the average yield being eleven bushels per acre. This plant is stated to have an excellent effect on lands that have been exhausted by wheat; and the rapidly increasing cultivation, nearly five-fold in four years, attests its value as a subsidiary crop.

"Only 4,210 acres of oats were grown, as compared with 4,846 acres last season, or a decrease of 636 acres. The quantity was also deficient, the average yield being very low, only fourteen bushels to the acre—producing a total of 59,213 bushels. This cereal is chiefly cultivated in the moister climate enjoyed in the southern portions of the Province.

"Potatoes were not planted to a greater extent than in the preceding season, whilst the produce has been slightly below, the average yield showing 47cwt. to the acre, or one cwt. less. The total area dug was 2,684 acres, and the aggregate produce 6,335 tons—about one-half of our yearly requirements. Nevertheless the cultivation of this esculent has retrograded during the past five years, and at least thirty thousand pounds sterling per annum is sent to Victoria to make up the deficient supply.

"Orchards and gardens are returned as covering 6,327 acres, 2,684 being of the former and 3,715 of the latter. In addition thereto, 6,063 acres are under vines; the number in bearing being 5,853,427, whilst 513,088 are yet unproductive. These figures show a slight decrease on previous statements. The vintage of 1867-8, to which the returns refer, produced 812,118 gallons, as compared with 863,584 gallons the year preceding. Taking the average of seasons, the annual production is over eight hundred thousand gallons, or nearly five gallons per head of the population. About one hundred and forty gallons is the average production per acre.

"The aggregate area of land described as in fallow was 118,404 acres, or only 1,077 acres less than in the previous year. Under this head is included virgin soil broken up in anticipation of the ensuing seed-time.

"The live stock returns are of a favorable character, especially as regards cattle and sheep; the former showing an increase for the first time since 1863, and the latter maintaining the rapid rate of increase which distinguished the return of last year.

"The number of horses (exclusive of those in towns) amounted to 75,409, or 1,181 more than in the previous year. Since 1863 this description of stock has increased about one-third. With a profitable market at hand, the breeding of a superior stamp of horse-flesh upon agricultural holdings would add materially to our farmers' resources. The aggregate number exported during the past ten years is 4,925, or an average of 492 yearly. Since 1863, however, when 902 were sent away, the shipments have gradually declined.

"When it is remembered that during the last six years our herds of cattle have diminished one-half, it is satisfactory to notice that these returns show an increase, however small. The number given is 123,213, as compared with 122,200 last year, or an addition of 1,013 head. The fattening of stock on farms would also seem worthy the greater attention of agriculturists, seeing that the Adelaide meat market has for years been chiefly supplied from Queensland and New South Wales. The number of cattle crossing into South Australia, *via* the Darling, during the past four years has been 26,000, or an average of 6,500 head annually.

"Nearly five million sheep are now depastured within the Province, the increase during the past year having exceeded half a million. During the last three years the number has rapidly augmented. In 1867 there were 3,911,610; in 1868, 4,477,445; and in 1869, 4,987,024, showing an increase of one million and seventy-five thousand, or more than one-fourth, in two years.

"Three-fourths of the aggregate number are depastured within Counties, the remaining fourth only on runs held under the ordinary fourteen years' leases. In the South-East 1,449,646 are kept within the boundaries of the proclaimed Counties, or 150,000 more than are found on the whole of the pastoral districts outside of Counties. In Counties Grey and Robe there is one sheep for every three acres of land. The fencing of

of pastoral country has been very extensive, and has contributed greatly to the satisfactory increase shown in the number of flocks."

"It will be observed that the yield per acre has only been less on two occasions—and, seeing that this poor return immediately followed an almost total failure of the crops, the depressed state of the agricultural tenants cannot be wondered at. It will also be noted that two bad harvests have come together for the first time. Comparatively, but few complaints were made of the existence of red rust—and the scourge "take-all," was not more prevalent than hitherto; nevertheless, the absence of moisture, for the rainfall was below the average, was sufficient to affect the yield very materially. Important results have attended the experiment of sowing shrivelled grain, which was done to a large extent—seed wheat being, in many instances, beyond the reach of the small farmer—for it has been proved that the growth of the plant, and the quality and yield of grain from the inferior seed were perfectly satisfactory—an incalculable boon to those who had the courage to adopt it, and the means of greatly alleviating the disastrous effects of the previous harvest.

"More hay was grown than in 1867-8; probably, the fear of a return of red rust may, to some slight extent, have induced farmers to cut their wheat for hay. The increase, however, is only about one-tenth of the usual crop; the total area grown amounted to 106,644 acres, as compared with 97,432 acres last season—showing an increase of 9,212 acres. The average yield per acre was 21cwt., or one cwt. below that of 1867-8. The total quantity stacked was 113,617 tons, or 4,032 tons more than in the preceding year.

"The high prices ruling show that the present production of this description of fodder is quite insufficient, and must be detrimental to the proper keeping of stock. Two years ago a crop of one hundred and fifty thousand tons, or twenty-five per cent. more than the last, was taken into consumption at fair average rates."

SHIPPING.

Owing to the failure of the harvest the export of breadstuffs was so diminished, that the number and tonnage of vessels employed in 1868 was very greatly reduced.

During the year, 446 vessels of 136,051 tons entered at ports in South Australia, as compared with 555 vessels of 167,547 aggregate tonnage in 1867, a decrease of 109 vessels, and 31,496 tons. Fifty-two vessels arrived from Great Britain, of 33,499 tons, an increase of twelve ships, and of 8,051 tons. The chief decrease was of course in the Inter-Colonial trade, the arrivals from Victoria being only 161, as against 223, and from New South Wales only 135 as against 167, the tonnage being proportionately reduced. The following statement shows the number and tonnage of vessels entered inwards from each country during the past three years:—

Ships Inwards.			Countries.	Tonnage.		
1866.	1867.	1868.		1866.	1867.	1868.
59	40	52	Great Britain	40,379	25,448	33,499
171	223	161	Victoria	40,969	56,457	44,079
178	167	135	New South Wales	58,796	53,337	33,672
46	37	42	Tasmania	5,692	4,682	5,552
5	10	1	Queensland	1,762	1,967	104
20	22	20	Western Australia	6,726	7,081	7,349
8	11	1	New Zealand	1,620	1,753	—
3	2	—	Cape of Good Hope	794	489	254
1	—	15	India and Singapore	793	—	—
15	17	—	Mauritius	3,381	4,567	3,492

3	4	6	China	693	866	1,241
524	555	446	Total inwards	169,439	167,547	136,051

All the above vessels, except 15, of 2,929 tons, entered with cargoes. The total number of the crews was 6,472, or 1,115 less than last year. In addition to the foregoing, 57 vessels, of 4,272 total tonnage and 308 men entered at ports on the River Murray. During the previous season 65 had entered, with a total capacity of 5,954 tons.

In comparison with 1867, when 581 vessels, of 176,272 tons, left the Province, the departures last year, especially to Great Britain, show a considerable reduction, the wheat trade

trade with England having ceased from the cause above mentioned. In 1868 only 457 ships, of 141,821 total tonnage, departed from these ports, showing a decrease of 124 vessels and 34,451 tons.

The subjoined return shows the number of vessels entered outwards and departing to each country during the past three years :—

Ships Outward.			Countries.	Tonnage.		
1866.	1867.	1868.		1866.	1867.	1868.

2	2	—	China	1,296	452	—
11	—	—	Guam	5,000	—	—
515	581	457	Total outwards	170,432	176,272	141,821

In 1866 thirty vessels sailed for Great Britain, 736 being the average tonnage; in 1867, seventy-three vessels, average tonnage 610; and in 1868, thirty-seven ships, averaging 670 tons burthen. The total number of vessels registered as belonging to Port Adelaide is 126 of 14,753 register tonnage.

RAILWAYS.

To the failure of the crops must chiefly be attributed the serious falling off in the traffic returns of the Railways. The passenger traffic was of course also much affected. The total number of passengers travelling was only 373,261 as compared with 444,089 in 1867, or 70,828 decrease. The receipts amounting to £28,912 as against £34,114. The goods traffic had never been so small since the opening of the line—only 108,018 tons, producing £51,091 revenue, as compared with 266,705 tons, producing £88,577 receipts in the previous year. The following return shows the gross receipts and expenditure, and a detailed statement of traffic for the past three years:—

	1866.	1867.	1868.	1866.	1867.	1868.
GROSS RECEIPTS—				£	£	£
Number of passengers	405,502	444,089	373,261	36,183	34,114	28,912
Passenger receipts				75,247	88,577	51,071
Tons of Goods	208,984	266,705	108,018	2,701	2,892	2,997
Goods receipts						
Other receipts						
Total receipts				£114,131	£125,583	£82,980
GROSS EXPENDITURE—				£	£	£
Management				1,735	2,050	1,782
Locomotive department				16,150	19,542	17,129
Maintenance of line				24,161	31,118	32,271
Other working expenses (including goods agency)				61,923	66,615	45,100
Total expenditure				£103,979	£119,325	£96,283

Under such circumstances, it is not surprising that the receipts were £13,303 below the working expenses, this being the first year in which such has been the case. The total receipts were £82,980, and the expenditure £96,283. In 1867, the former amounted to £125,583, and the latter to £119,325. With the exception of the item “goods agency,” the working expenses could not be greatly reduced, as the train mileage run was only 14,796 less (a reduction partly consequent upon the opening of the Loop Line), being 149,683 as against 164,479 in 1867, and 128,957 miles in 1866, although the diminution in the traffic was so great. £32,271 were expended in maintenance (or rather reconstruction) of permanent way, as against £31,118 last year.

MAIN ROADS.

The Central Board of Main Roads constructed during the year 1868, seventy-eight miles of new macadamised road, making a total length of main lines completed to be 574 miles, of which 424 miles have been formed during the last ten years. In 1867, seventy-nine miles were constructed.

The

The expenditure of the Board for the year in construction and maintenance of existing lines was £129,242, as compared with £175,773 in the previous twelve months. The large sum of £983,137 sterling, has been expended under their supervision during the past ten years; whilst the Local Boards, Municipalities, and District Councils have defrayed out of local rates and grants from the Public Treasury, almost an equal amount upon the improvement of this means of internal communication.

POSTAL COMMUNICATION.

The extension of the Postal Service effected in 1867, although rendering much greater facilities than had previously existed, has not induced any rapid increase in postal business, whilst the service, from being self-supporting, has become a burden on the State to the amount, last year, of £11,887.

Subjoined is a statement of the number of letters and newspapers carried, and of the income and expenditure of the department:—

	1866.	1867.	1868.
Number of letters	2,703,105	2,804,418	2,850,926
Number of newspapers	1,968,120	1,924,760	2,086,799
Distance travelled by mails	809,160	1,075,538	1,093,628
	£	£	£
Income	27,987	28,495	28,243
Expenditure	27,062	37,753	40,130

As compared with 1866, the number of miles travelled by mails is as 1,093,628 to 809,160. The length of the mail routes is now 4,326 as against 3,797 miles. The number of post offices has increased from 226 to 254, and of persons employed from 299 to 343. The receipts have augmented from £27,987 to £28,243, or by £256 only, whilst the expenses have increased by £13,068, or from £27,062 to £40,130. The number of letters carried has increased from 2,703,105 to 2,850,926, and the newspapers from 1,968,120 to 2,086,799. There is no doubt the general depression in trade during the year under review (1868) had a serious effect upon the receipts of this department, and prevented the expansion probably anticipated.

TELEGRAPHS.

There are now sixty-five Telegraph Stations open, one more than in 1867. The length of line erected is 1,113 miles, and of wire 1,642 miles. The total number of messages delivered was 110,400, or 11,738 less than in the previous year. The total receipts amounted to £11,223 as compared with £12,673, or £1,450 less. This diminution was chiefly owing to the depression in trade caused by the failure of the harvest, and affected principally the returns from the North and Inter-Colonial lines.

CONCLUSION.

The usual statistical review of the progress of South Australia, since its foundation, closes this volume, and affords a means of ascertaining without trouble a general idea of the social and material development of the community from year to year.

I have the honor to be, Sir,

Your obedient humble servant,

J. BOOTHBY,

Under Secretary and Government Statist.

The Government of the United States of America, by and through the Secretary of the Interior, do hereby certify that the following is a true and correct copy of the original as the same appears in the records of the Department of the Interior.

Witness my hand and the seal of the Department of the Interior at Washington, D.C., this 10th day of June, 1906.

1906
JUN 10
1906

Very truly yours,
J. H. ROBERTS,
Secretary of the Interior.

Approved: _____
Special Agent in Charge.

Under Secretary and Government Affairs.

Your obedient servant,
J. H. ROBERTS.

1868.

SOUTH AUSTRALIA.

* The inmates comprised in this return may be classed as follows, namely—Aged and infirm, sick and deserted children. No able-bodied person is at any time admitted into the Destitute Asylum.

† All the male adults specified in this return were relieved in consequence of sickness, on a medical certificate. Many of the females received out-door relief from similar causes. The residue, with the whole of the children enumerated in the table, were relieved in consequence either of the death of the husband, or the desertion of the family by the husband.

T. S. REED, Chairman.

SOUTH AUSTRALIA—1868.

* Three quarterly instalments of vote of £1,000 only received to date.

† Grant for 1860—61, was only £500.

‡ A considerable number of worn out or otherwise useless books were weeded out during these two years. For 1865 and subsequent years, the number of books stated, is that contained in the Library at the time of the annual examination which takes place in the first week of May, in each year.

|| For this and following years the average number of subscribers is ascertained from the actual amount of subscriptions received, instead of being estimated, as formerly; there is, therefore, a considerable apparent falling off, chiefly due to the above mentioned cause.

DECENNIAL RETURN of NUMBER of BOOKS, &c., in COUNTRY INSTITUTES in SOUTH AUSTRALIA

	No. of vols. circulated in year ending July 1st.	Number of Books in Libraries, July 1st.	Number of Subscribers, July 1st.	Annual Income (not including Government Grant) for year ending July 1st.	Amount of Government Grant last received.

					{ 1,199 11 9

* For six months, to 30th June, 1865.

† For six months to 31st December, 1865.

‡ Five new Institutes, no return received.

|| Three new Institutes, no return received.

§ Several of these have been formed or revived within the year; there were also three Institutes from which no returns have been received, and four new ones recently affiliated, or seeking to be so.

¶ Three of these have been formed within the year. There are also three of the existing Institutes from which returns have not yet been received, and three new ones which have been established since July 1, 1863, as well as two which are at present dormant, or nearly so. In addition to the above there are two Institutes not at present affiliated to the South Australian Institute; making the total number in the Province thirty-seven, of which, thirty-five are in active operation.

** In addition to the above, seven Institutes have been affiliated to the South Australian Institute during 1864, for which returns cannot at present be given; one is making application to be affiliated, and two are believed to be in existence, although not now connected with the South Australian Institute, making a total number of forty-three in operation in the Province. There are also several others in a dormant state, of which it is not necessary to take account.

†† In addition to the above, one Institute has been affiliated to the South Australian Institute during the year, for which returns cannot be given, one is seeking to be affiliated, and two others are believed to be in existence, though not connected with the South Australian Institute, making a total of forty-three at present in existence.

‡‡ In addition to the above, two Institutes have been affiliated to the South Australian Institute during the year, for which returns cannot be given, and three others are believed to be in existence, making a total of forty-three. The return of annual income is necessarily larger this year, on account of the Fancy Fair held by the Gawler Institute, in aid of its building fund.

||| In addition to the above, five new Institutes have been affiliated to the South Australian Institute since July 1st, 1867, for which no returns could be given; one Institute included above has temporarily suspended operations since July 1st, 1867, and there is believed to be one Institute not in connection with the South Australian Institute—making a total of forty-eight Institutes in operation in the Province.

¶¶ Four new Institutes have been affiliated to the South Australian Institute since July 1st, 1868, making a total at the present time of forty-nine.

ROBERT KAY, Secretary South Australian Institute.

The figures previous to 1850 have been procured from the best available sources; where blanks occur, the information was not attainable.

‡ The effect of the gold discoveries is indicated in the years immediately following 1851.

|| Land Fund included since 1849.

J. BOOTHBY, Government Statist.
